RULES TO LIVE BY I: PRIORITY STANDARDS: METAL/NONMETAL

1. §56.9101 Operating speeds and control of equipment
   Operators of self-propelled mobile equipment shall maintain control of the equipment while it is in motion. Operating speeds shall be consistent with conditions of roadways, tracks, grades, clearance, visibility, and traffic, and the type of equipment used.

2. §56.12017 Work on power circuits
   Power circuits shall be deenergized before work is done on such circuits unless hot-line tools are used. Suitable warning signs shall be posted by the individuals who are to do the work. Switches shall be locked out or other measures taken which shall prevent the power circuits from being energized without the knowledge of the individuals working on them. Such locks, signs, or preventative devices shall be removed only by the person who installed them or by authorized personnel.

3. §56.14101(a) Brake performance
   (a) Minimum requirements. (1) Self-propelled mobile equipment shall be equipped with a service brake system capable of stopping and holding the equipment with its typical load on the maximum grade it travels. This standard does not apply to equipment which is not originally equipped with brakes unless the manner in which the equipment is being operated requires the use of brakes for safe operation. This standard does not apply to rail equipment. (2) If equipped on self-propelled mobile equipment, parking brakes shall be capable of holding the equipment with its typical load on the maximum grade it travels. (3) All braking systems installed on the equipment shall be maintained in functional condition.

4. §56.14105 Procedures during repairs or maintenance
   Repairs or maintenance of machinery or equipment shall be performed only after the power is off, and the machinery or equipment blocked against hazardous motion. Machinery or equipment motion or activation is permitted to the extent that adjustments or testing cannot be performed without motion or activation, provided that persons are effectively protected from hazardous motion.

5. §56.14130(g) Seat belts shall be worn by equipment operators
   except that when operating graders from a standing position, the grader operator shall wear safety lines and a harness in place of a seat belt.

6. §56.14131(a) Seat belts shall be provided and worn in haul trucks

7. §56.14205 Machinery, equipment, and tools used beyond design capacity intended by the manufacturer where such use may create a hazard to persons.

8. §56.14207 Parking procedures for unattended equipment
   Mobile equipment shall not be left unattended unless the controls are placed in the park position and the parking brake, if provided, is set. When parked on a grade, the wheels or tracks of mobile equipment shall be either chocked or turned into a bank.

9. §56.15005 Safety belts and lines
   shall be worn when persons work where there is danger of falling; a second person shall tend the lifeline when bins, tanks, or other dangerous areas are entered.

10. §56.16002(c) Bins, hoppers, silos, tanks, and surge piles
    Where persons are required to enter any facility listed in this standard for maintenance or inspection purposes, ladders, platforms, or staging shall be provided. No person shall enter the facility until the supply and discharge of materials have ceased and the supply and discharge equipment is locked out. Persons entering the facility shall wear a safety belt or harness equipped with a lifeline suitably fastened. A second person, similarly equipped, shall be stationed near where the lifeline is fastened and shall constantly adjust it or keep it tight as needed, with minimum slack.

11. §56.16009 Persons shall stay clear of suspended loads

12. §56.20011 Barricades and warning signs
    Areas where health or safety hazards exist that are not immediately obvious to employees shall be barricaded, or warning signs shall be posted at all approaches. Warning signs shall be readily visible, legible, and display the nature of the hazard and any protective action required.

13. §57.3360 Ground support use (Underground)
RULES TO LIVE BY III: PRIORITY STANDARDS: METAL/NONMETAL

1. §46.7(a) - New task training
You must provide any miner who is reassigned to a new task in which he or she has no previous work experience with training in the health and safety aspects of the task to be assigned, including the safe work procedures of such task, information about the physical and health hazards of chemicals in the miner's work area, the protective measures a miner can take against these hazards, and the contents of the mine's HazCom program. This training must be provided before the miner performs the new task.

2. §56.3130 - Wall, bank, and slope stability
Mining methods shall be used that will maintain wall, bank, and slope stability in places where persons work or travel in performing their assigned tasks. When benching is necessary, the width and height shall be based on the type of equipment used for cleaning of benches or for scaling of walls, banks, and slopes.

3. §56.3200 - Correction of hazardous conditions
Ground conditions that create a hazard to persons shall be taken down or supported before other work or travel is permitted in the affected area. Until corrective work is completed, the area shall be posted with a warning against entry and, when left unattended, a barrier shall be installed to impede unauthorized entry.

4. §56.14100(b) - Safety defects; examination, correction and records
Defects on any equipment, machinery, and tools that affect safety shall be corrected in a timely manner to prevent the creation of a hazard to persons.

5. §56.15020 - Life jackets and belts
Life jackets or belts shall be worn where there is danger from falling into water.
